Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2500 Series Digital Lock is a medium-duty, keyless mechanical keypad designed specifically for sliding doors. Equipped with a surface-mounted rim hookbolt, this lock is the ideal security solution for sliding patio doors and light industrial sliding doors. It is highly versatile and can be fitted to wooden, UPVC, or aluminium doors.

Because it is a fully mechanical digital lock, the Lockey 2500 requires no batteries, wiring, or electrical connection, ensuring reliable, continuous operation. It features a protective clutch mechanism to prevent damage from forced entry attempts and is weather-resistant, making it suitable for both internal and external installations. The lock is non-handed and fully reversible, allowing it to be fitted to either left- or right-handed sliding doors.

With a 14-button keypad, users can easily set a single code of 4 to 6 digits from over 1,000 possible combinations. Operation is straightforward: entry from the outside requires the correct code followed by a turn of the thumbturn, while the inside thumbturn provides free exit at all times.

Technical Specifications

- **Backset:** 20mm
- **Case Depth Required:** 40mm
- **Door Thickness:** 35mm to 55mm
- **Latch Type:** 20mm Rim Hookbolt
- **Keypad:** 14 buttons
- **Code Length:** 4 to 6 digits
- **Combinations:** 1,000+
- **Finish:** Satin Chrome

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
