Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2835 Series Digital Lock is a highly reliable, mechanical keyless entry solution designed for both residential and commercial doors. Featuring robust lever handles on both the inside and outside, this lock operates entirely mechanically, eliminating the need for batteries, wires, or electrical connections.

A standout feature of the 2835 Series is its dual functionality, offering both a holdback facility and a free passage function. This allows the lock to be set to remain unlocked, enabling free, code-free entry and exit during busy periods. Security is maintained by a 60mm latch bolt equipped with an anti-thrust pin to prevent tampering. With fully reversible handles, it is easily configured for both left and right-handed doors.

Technical Specifications

- **Brand:** Lockey
- **Model:** 2835 Series
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 55mm

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
