Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 7300 Lever Handle Mechanical Digital Lock is a medium-duty, reversible digital lock designed for reliable access control. Featuring a simplified, easy-to-use code change system on the reverse of the keypad, this lock allows you to quickly update your entry code with a simple flick of the switches. It is equipped with ball-bearing push buttons that offer enhanced resistance to code manipulation, providing over 7,000 non-sequential combination options of 3 to 7 digits.

This model is supplied with an 8mm square bar spindle, making it ideal for use with various DIN locks and lock cases (available separately). For added convenience, it includes a passage function for free passage when restricted access is not required. The outside handle is fitted with a clutched mechanism to prevent damage if forced, ensuring long-lasting durability. Suitable for doors between 35mm and 55mm in thickness, the Lockey 7300 offers a robust and flexible security solution in a stylish satin chrome finish.

Technical Specifications

- **Brand:** Lockey
- **Manufacturer Reference:** 7300

- **Finish:** Satin Chrome
- **Spindle:** 8mm square bar spindle
- **Door Thickness:** 35mm to 55mm
- **Code Length:** 3 to 7 digits
- **Combinations:** 7,000+ non-sequential code groups
- **Backset:** 60mm
- **Case Depth Required:** 88mm
- **Handing:** Left Hand (reversible onsite)
- **Operation Outside:** Lever handle on entry of code
- **Operation Inside:** Lever handle free exit
- **Holdback:** No
- **Key Override:** No
- **Latch:** 60mm Standard
- **Width:** 50mm

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
