Specification Summary

Brand	Lockey
Product type	Key Safe

Product Description

The Lockey Digital Lock Key Safe is a compact, robust, and highly reliable solution designed for secure key storage and sharing. Based on the classic "Little Lockey" digital lock design, this mechanical key safe operates entirely without batteries or wiring, making it ideal for both indoor and outdoor installations. It provides a safe and convenient way to share access with family members, carers, cleaners, or maintenance staff, ensuring you always know where your keys are.

To ensure maximum usability and prevent accidental drops, the front lid detaches completely when unlocked but remains securely connected to the rear body by an internal steel chain. The digital combination code can be easily changed once the unit is unlocked, allowing you to update access permissions whenever necessary.

This key safe is available in multiple finishes, including Brown, Dull Green, and Satin Chrome, with corresponding manufacturer references and barcodes. Please choose your preferred option from the selection below to suit your installation environment.

Technical Specifications

- **Brand:** Lockey
- **Width:** 50mm
- **Depth:** 62mm
- **Weight:** 600g
- **Capacity:** Holds up to 3 standard cylinder keys
- **Finishes Available:** Brown, Dull Green, or Satin Chrome (please select from the options below)

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
