Specification Summary

Brand	Lockey
Product type	Accessory

Product Description

The Lockey Knob Return Spring is a genuine replacement part designed specifically for Lockey digital locks. Over time, the internal spring mechanism in mechanical digital locks can wear out or lose tension, causing the knob to sag and fail to return to its original position. This replacement spring offers an easy, cost-effective way to restore the smooth operation of your lock without the need to replace the entire unit.

This spring is designed to fit the internal backplate of both the Lockey 2430 and Lockey 2435 digital lock models. Supplied as a single loose item, it is straightforward to install, making it an essential spare part for locksmiths, maintenance teams, and DIY repairs.

Technical Specifications

- **Brand:** Lockey
- **Manufacturer Reference:** RETURN KNOB
- **Part Number:** L8376
- **Compatibility:** Lockey 2430 and 2435 digital locks (internal backplate)
- **Pack Quantity:** 1
- **Packaging:** Loose

- **Weight:** 10g
- **Barcode:** 5055120628899

Key Features

- **Genuine Replacement Part:** Designed by Lockey to ensure perfect compatibility and reliable performance.
- **Cost-Effective Repair:** Restores the spring-back action of the internal knob, saving the expense of replacing the entire lock.
- **Specific Compatibility:** Tailored to fit the internal backplate of Lockey 2430 and 2435 digital locks.
- **Easy to Install:** Simple to fit during routine lock maintenance.

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
