### Product Description

The Lockey L220 "Little Lockey" is a compact and discreet mechanical digital surface rim lock designed to blend seamlessly with standard household fixtures and fittings. Its small footprint makes it an ideal security solution for home offices, cupboards, cabinets, and doors where space is at a premium.

This surface-mounted lock features an internal sliding bar with a 57mm throw and can be installed as close to the edge of the door as required. Operating without a "C" button to clear the code, it offers keyless convenience with over 5,000 possible code combinations. Built to last, the L220 features Teflon-coated stainless steel internal components to reduce wear and tear, alongside a slipping clutch mechanism on the knob to prevent damage if forced.

## Technical Specifications

- **Brand:** Lockey
- **Model:** L220 (Little Lockey)
- **Width:** 37mm
- **Height:** 125mm
- **Backset:** 20mm

# Brand Profile

Lockey

**Lockey** (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

## What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

## UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
