Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey L235 "Little Lockey" is a compact and discreet mechanical digital mortice lock designed to blend seamlessly with standard household fixtures and fittings. Its small footprint makes it an ideal security solution for residential and light commercial applications, including home offices, cupboards, cabinets, and internal doors.

Equipped with a passage mode function, the L235 allows for unrestricted entry and exit when security is not required. The lock features a standard 12-button keypad, offering over 5,000 potential code combinations ranging from 3 to 7 digits. For added durability and security, the internal components are Teflon-coated to reduce wear, and

the external knobs are fitted with a slipping clutch mechanism to prevent damage if forced. Fully reversible and weather-resistant, this digital lock is suitable for both internal and external doors.

Technical Specifications

- **Brand:** Lockey
- **Model:** L235 (Little Lockey)
- **Backset:** 60mm
- **Latch:** 60mm to 70mm
- **Required Case Depth:** 95mm
- **Door Thickness:** 35mm to 55mm
- **Keypad:** 12-button
- **Code Length:** 3 to 7 digits (over 5,000 combinations)
- **Finish:** Satin Chrome
- **Handing:** Reversible
- **Dimensions:** 125mm (H) x 37mm (W)
- **Operation Outside:** Thumbturn on entry of correct code
- **Operation Inside:** Thumbturn with free exit

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
