Specification Summary

Brand	Lockey
Product type	Key Safe

Product Description

The Lockey LKS500 Digital Key Safe is a robust, mechanical push-button key safe designed to store larger keys or multiple key sets securely. It is an ideal solution for properties where physical key handovers are difficult or impractical, such as holiday lets, remote sites, or homes requiring access for care workers, cleaners, and tradespeople.

Designed to look and operate like a digital door lock, the LKS500 can be mounted on a door or wall, blending in seamlessly to provide an extra layer of discreet security. The two halves of the unit are connected by an internal steel chain, ensuring the front face is never dropped or lost during use. It features an optional passage function, allowing you to open and re-lock the safe without needing to re-enter the code every time.

With over 4,000 possible code combinations, this weather-resistant key safe offers reliable, keyless security for both indoor and outdoor installations. It is supplied complete with all necessary fixing screws and a spare code tumbler for quick and easy code changes.

Technical Specifications

- **Brand:** Lockey
- **Manufacturer Reference:** LKS500

- **External Height:** 140mm
- **External Width:** 60mm
- **Internal Depth:** 20mm
- **Internal Height:** 90mm
- **Finish:** Satin Chrome
- **Weight:** 670g
- **Pack Quantity:** 1

Key Features

- **Spacious Internal Capacity:** Designed to accommodate larger keys or multiple key sets up to 90mm in length.
- **Retained Front Plate:** Internal steel chain holds the two halves together to prevent the front face from being dropped or lost.
- **Discreet Design:** Mimics the appearance of a digital door lock for a more subtle, secure look when mounted.
- **Passage Function:** Optional passage mode allows the safe to be opened and re-locked without re-entering the code each time.
- **Weather Resistant:** Suitable for both indoor and outdoor wall or door mounting.
- **Easy Code Changes:** Supplied with a spare code tumbler and fixings for straightforward installation and code updates.

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
