Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The LOCKEY Super 8 Digital Lock (7055) is a highly versatile, slimline mechanical digital lock designed for medium to heavy-duty applications. Measuring just 40mm wide, its sleek and narrow profile makes it the perfect choice for narrow stile doors, including timber, aluminium, and UPVC, where standard digital locks are too wide to fit.

Built to withstand demanding environments, this lock features Teflon-coated internal components to reduce friction and delay natural wear and tear. It incorporates a patented code chamber that offers a unique advantage: the flexibility to use the same digit twice in your code (for example, C2244). For added security and durability, the reversible lever handles are equipped with a slipping clutch mechanism, preventing damage to the internal lock mechanism if forced. Suitable for both internal and external installations, it comes complete with an adjustable 60mm to 70mm latch and an optional holdback facility for passage mode.

Technical Specifications

- **Brand:** Lockey
- **Manufacturer Reference:** 7055 (L22200)
- **Width:** 40mm
- **Depth:** 40mm
- **Backset:** 60mm to 70mm adjustable latch
- **Case Depth Required:** 95mm
- **Door Thickness:** 35mm to 55mm
- **Finish:** Satin Chrome
- **Handing:** Reversible
- **Code Length:** 5 digits
- **Combinations:** 7,000+
- **Operation Inside:** Lever handle free exit
- **Operation Outside:** Lever handle on entry of code
- **Holdback:** Yes
- **Key Override:** No
- **Weather Resistant:** Yes
- **Guarantee:** Limited Lifetime

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
