## Product Description

The Lockey Super 8 Narrow Style Digital Lock is a heavy-duty, weather-resistant mechanical keypad lock designed specifically for narrow-stile aluminium doors. Measuring just 40mm wide, this slimline digital lock provides robust security without compromising on style or functionality. It features Lockey's patented code chamber, which offers over 7,000 combinations and provides the unique flexibility to use the same digit twice in a code.

To prevent damage from forced entry, the lever handles are equipped with a slipping clutch mechanism. Inside, Teflon-coated components ensure smooth, long-lasting operation. The lock is designed to retrofit with an Adams Rite 4710 latch (not supplied) and comes complete with fixing plates to suit multiple centre measurements.

This digital lock is available in multiple configurations, with options for key override (using a Euro cut-out plate, cylinder sold separately) or no key override (using a blank plate). Please select your preferred manufacturer reference, barcode, and key override option from the choices below.

# Brand Profile

Lockey

**Lockey** (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

## What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

## UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
