Specification Summary

Brand	Lockwood
Product type	Lockwood

Product Description

The Lockwood DGT530 Deadlatch Digital Lock is a high-quality mechanical digital lock designed to provide reliable, keyless access control. It is particularly well-suited for commercial, public, and residential environments where security needs to be maintained and frequent code changes are required.

This robust lock features a simplified, one-way re-coding system that makes updating the combination quick and straightforward. Its non-handed, reversible design ensures it can be installed on both inward and outward opening doors. Built with a durable satin chrome finish, the unit is weather-resistant and suitable for a variety of external or internal applications.

Operation is simple: entry from the outside is gained via a thumbturn after entering a correct 4 to 6-digit code, while the internal thumbturn provides unrestricted free exit at all times.

Technical Specifications

- **Brand:** Lockwood
- **Manufacturer Reference:** DGT530
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness Suitability:** 35mm to 45mm
