Specification Summary

Brand	Master Lock
Product type	Open Shackle

Product Description

The Master Lock 410 Lock-Out Padlock Set contains four identical, keyed-alike padlocks designed specifically for Lockout/Tagout (LOTO) safety procedures. Engineered for industrial and commercial environments, these padlocks help safety managers comply with safety directives by ensuring secure isolation of machinery and equipment.

Each padlock features a lightweight yet highly durable Zenex™ thermoplastic body that is non-conductive and resistant to extreme temperatures and chemicals. The 38mm wide body is paired with an extra-long steel shackle, providing a 38mm vertical clearance for a variety of lockout applications.

For enhanced safety, the padlocks are equipped with a high-security 6-pin tumbler cylinder and a key-retaining feature, which prevents the key from being removed while the padlock is open. This ensures the lock is never accidentally left unlocked. Supplied as a set of four keyed-alike padlocks, this pack is an efficient solution for individual workers requiring multiple locks under a single key. Master keying is also available as a special order option.

Technical Specifications

- **Brand:** Master Lock
- **Model Reference:** 410
- **Body Width:** 38mm
- **Body Material:** Zenex™ Thermoplastic
- **Shackle Diameter:** 6mm
- **Vertical Shackle Clearance:** 38mm
- **Shackle Material:** Steel
- **Locking Mechanism:** 6-pin tumbler
- **Keying:** Keyed Alike (in sets of 4)
- **Master Keying (MK):** Special Order
- **Pack Quantity:** 4
- **Weight:** 110g per padlock
- **Packaging:** Boxed

Key Features

- **Lockout/Tagout Design:** Specifically engineered for safety isolation and LOTO applications.
- **Keyed Alike Convenience:** Set of 4 padlocks operated by the same key, ideal for individual employee use.
- **Non-Conductive Body:** Lightweight Zenex™ thermoplastic construction is non-conductive, chemical-resistant, and durable.
- **Key Retaining Safety:** Key cannot be removed while the padlock is unlocked, ensuring it is always securely closed after use.
- **High Security Cylinder:** Features a 6-pin tumbler mechanism for excellent pick resistance.

Brand Profile

Master Lock

Master Lock is the classic American “padlock brand” - the one that’s been on job sites, school lockers, garage doors, and storage units for so long it’s basically part of the urban landscape. The company was founded in **1921** by locksmith-inventor **Harry Soref** in the Milwaukee area, built around his breakthrough **laminated steel padlock** design: strong, affordable, and mass-producible — the security industry’s equivalent of discovering fire, but with more rivets.

What they’re known for is broad “portable security” rather than door hardware:

- **Padlocks** (keyed, combination, weather-resistant, heavy-duty)
- **Lock boxes / key safes** (mechanical and Bluetooth variants for managed access)
- **Safes and security storage** (varies by market, often alongside their lockbox line)
- **Lockout/Tagout (LOTO)** safety products for industrial settings (a big part of their professional footprint)

Ownership / group: Master Lock is a subsidiary within **Fortune Brands Innovations**’ security portfolio (the same broader group that also houses other security brands).
