## Product Description

The Master Lock 5426EURD is a high-security, extra-large key safe designed to provide a secure way to share keys and access cards. It is ideal for home care services, CCTV companies, and domestic properties. Constructed from heavy-duty zinc with a recessed door, this key safe is highly resistant to physical attacks, including sawing and levering.

It features a user-friendly 14-button keypad that allows for up to 16,000 potential combinations using both letters and numbers, making it easy to set and reset your own code. The extra-large internal storage capacity is spacious enough to accommodate multiple keys, bunches, and access cards. For added protection against the elements, it comes with a removable black ABS plastic weather cover.

This key safe is officially certified, holding Sold Secure Silver (Key Safes) and Secured by Design (Police Preferred Specification) accreditations. It is supplied with high-security fixings, a recode tool, a key hook, and a plastic tray insert for straightforward wall mounting.

## Brand Profile

Master Lock

**Master Lock** is the classic American “padlock brand” - the one that’s been on job sites, school lockers, garage doors, and storage units for so long it’s basically part of the urban landscape. The company was founded in **1921** by locksmith-inventor **Harry Soref** in the Milwaukee area, built around his breakthrough **laminated steel padlock** design: strong, affordable, and mass-producible — the security industry’s equivalent of discovering fire, but with more rivets.

**What they’re known for** is broad “portable security” rather than door hardware:

- **Padlocks** (keyed, combination, weather-resistant, heavy-duty)
- **Lock boxes / key safes** (mechanical and Bluetooth variants for managed access)
- **Safes and security storage** (varies by market, often alongside their lockbox line)
- **Lockout/Tagout (LOTO)** safety products for industrial settings (a big part of their professional footprint)

**Ownership / group:** Master Lock is a subsidiary within **Fortune Brands Innovations**’ security portfolio (the same broader group that also houses other security brands).
