0	A		Yes
1	B		Yes
2	C		Yes

Product Description

Our professional key cutting service provides high-quality replacement and spare keys for Millenco Magnum euro cylinder locks, which are commonly used in uPVC and double-glazed doors. Millenco Magnum locks have since been rebranded as Yale Superior, and we can also build extra locks to match your existing keys, keying them alike

to new Yale Superior branded euro locks.

To order, simply provide the unique A, B, and C codes found on your original plastic key code card. If you have lost your code card, please contact our team for assistance; we can often decode your key from a high-quality photograph or copy a physical working key sent to us.

As Registered Master Locksmiths, we prioritise your security. We strongly advise having your keys delivered to an alternative address, such as your workplace or a friend or family member. For added peace of mind, all keys are shipped securely without any customer details or address information inside the packaging.

Technical Specifications

- **Lock Compatibility:** Millenco Magnum euro cylinder locks (also compatible with Yale Superior series)
- **Key Type:** Dimple and trace security key
- **Code Requirements:** Requires unique A, B, and C codes from the original key card
- **Alternative Copying Methods:** Can be cut from a high-quality photo or a physical working key (if code card is lost)

Key Features

- **Precision Cutting:** Cut using state-of-the-art machinery for a reliable fit
- **Rebranded Continuity:** Suitable for older Millenco Magnum locks and newer Yale Superior branded cylinders
- **Secure Ordering:** Handled by Registered Master Locksmiths
- **Enhanced Security Shipping:** Shipped without customer or address details inside the package for maximum security
- **Delivery Advice:** Recommended delivery to an alternative address (e.g., workplace or family) for added safety

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
