Is Cylinder

Product Description

The Mul-T-Lock MT5 Euro Key & Turn (Thumbturn) Cylinder offers premium, high-security protection for domestic and commercial doors. Combining advanced mechanical engineering with patented key control, the MT5 platform is designed to resist common forms of cylinder attack, including picking, drilling, and bumping.

This cylinder features a double locking mechanism, integrating Mul-T-Lock's high-precision telescopic pin tumbler system alongside the patented Alpha Spring. The Alpha Spring is a unique mobile element at the tip of the key that engages a special pin at the rear of the cylinder to create an additional shear line, providing superior manipulation resistance.

For enhanced security, the MT5 system uses restricted key control. Keys are supplied with a unique coded magnetic authorization card, ensuring that additional keys can only be duplicated by authorized dealers upon presentation of the card.

Important Ordering Information: When choosing an offset cylinder, please ensure you select the correct side for the thumbturn. In the options below, the letter **'T'** (or **'R'** in manufacturer codes) denotes the side of the cylinder where the thumbturn is located (e.g., T35x45 indicates the thumbturn is on the 35mm side, and the key is on the 45mm side).

These cylinders are available in a wide range of sizes and in both Nickel and Brass finishes. Please select your required size, finish, and turn configuration from the options below.

Technical Specifications

- **Cylinder Type:** Euro Profile Key & Turn (Thumbturn)
- **Locking Mechanism:** Double locking system (telescopic pin tumbler and patented Alpha Spring)
- **Key Control:** Restricted key duplication via unique coded magnetic card
- **Key Type:** Reversible flat key
- **Finishes:** Available in Nickel and Brass
- **Sizes:** Available in a wide range of overall lengths from 62mm to 100mm (with offset options)
- **Turn Side Indicator:** 'T' (or 'R') in the size option denotes the thumbturn side

Key Features

- **Premium Security:** Advanced double locking mechanism provides exceptional resistance to picking, drilling, and bumping.
- **Patented Alpha Spring:** A mobile element at the tip of the key engages a unique pin at the rear of the cylinder for an extra layer of protection.
- **Restricted Key Copying:** Coded magnetic authorization card prevents unauthorized key duplication.
- **User-Friendly Design:** Reversible flat key is easy to insert and operate from either side.
- **Versatile Options:** Available in multiple offset sizes and finishes to suit different door thicknesses and styles.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
