Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks C-Series Range
Keyway	Mul-T-Lock C-Series

Product Description

The Mul-T-Lock C10 Padlock is a professional, high-security padlock from the renowned C-Series range, designed to offer robust physical protection and exceptional key control for both commercial and residential applications. Constructed with a hardened steel shell and a 10mm hardened boron alloy steel shackle, this padlock provides formidable resistance against cutting, drilling, and forcing attempts.

Engineered for reliable outdoor performance, the C10 features a protective keyway shutter to prevent dust and dirt contamination, alongside drainage holes to stop the mechanism from freezing in cold weather. Inside, Mul-T-Lock's high-precision telescopic pin tumbler cylinder delivers superior pick and drill resistance.

This padlock is available in two distinct configurations to suit your security requirements. Please choose your preferred option from the selection below:

- **C10 - OS (Open Shackle):** Features a pop-open shackle that retains the key when unlocked, requiring the key to lock it again.
- **C10 - REM (Removable Shackle):** The shackle is completely removable from the body with a non-key-retaining mechanism, making it ideal for tight spaces such as container hasps.

Technical Specifications

- **Body Material:** Hardened steel shell with a solid brass core
- **Shackle Material:** Hardened boron alloy steel
- **Shackle Diameter:** 10mm
- **Cylinder Technology:** High-precision telescopic pin tumbler system
- **Weather Protection:** Protective keyway shutter and drainage holes
- **Shackle Options:** Open Shackle (OS) or Removable Shackle (REM)

Key Features

- **High-Security Construction:** Hardened steel body and boron alloy shackle offer excellent resistance to physical attacks.
- **Weather Resistant:** Designed for outdoor use with built-in drainage holes to prevent freezing and a protective shutter to keep out dust and debris.
- **Pick & Drill Resistant:** Advanced cylinder mechanism provides high-level protection against manipulation and drilling.
- **Versatile Configurations:** Available in Open Shackle (OS) or Removable Shackle (REM) options to suit different locking requirements.
- **Patented Key Control:** Supplied with high-security keys and a duplication card to prevent unauthorised key copying.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
