Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks C-Series Range
Keyway	Mul-T-Lock C-Series

Product Description

The Mul-T-Lock C13 Padlock is a professional, high-security padlock designed to offer robust physical protection for demanding commercial and residential applications. Built with a heavy-duty hardened steel shell and a hardened boron alloy steel shackle, this padlock provides exceptional resistance against physical attacks, including cutting, drilling, and picking.

This padlock is available in two distinct configurations to suit your operational needs:

- **C13 POP (Pop-Open):** Features a pop-open shackle and a key-retaining mechanism, meaning the key remains trapped in the cylinder while the lock is open, preventing accidental locking.
- **C13 REM (Removable):** Features a fully removable shackle and a non-retaining key, allowing you to completely detach the shackle and remove the key while the padlock is unlocked.

Please select your preferred shackle operation option from the choices below.

Designed to withstand harsh outdoor environments, the C13 padlock features a protective shutter to prevent dust and dirt contamination, alongside integrated drainage holes to prevent freezing in cold weather.

Technical Specifications

- **CEN Rating:** Grade 4 (High Security)
- **Body Width:** 73mm
- **Body Height:** 51mm
- **Body Depth:** 25mm
- **Shackle Diameter:** 13mm
- **Shackle Clearance (Width):** 33mm
- **Body Material:** Hardened steel shell with black plated solid brass core
- **Shackle Material:** Hardened boron alloy steel
- **Cylinder Mechanism:** High-precision pin tumbler system (pick and drill resistant)
- **Weather Protection:** Protective dust shutter and drainage holes

Key Features

- **High-Security Protection:** CEN Grade 4 rated padlock offering exceptional resistance to physical attack and forced entry.
- **Two Shackle Options:** Choose between a pop-open (retaining key) or fully removable (non-retaining key) shackle to suit your security requirements.
- **Hardened Steel Construction:** Heavy-duty hardened steel body and boron alloy shackle provide superior cut and saw resistance.
- **Weatherproof Design:** Built-in dust shutter protects the cylinder from dirt, while drainage holes prevent freezing in cold conditions.
- **Drill and Pick Resistant:** High-precision cylinder mechanism designed to resist manipulation, picking, and drilling.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
