Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks C-Series Range
Keyway	Mul-T-Lock C-Series

Product Description

The Mul-T-Lock C-Series C6 Padlock is a professional, high-security padlock designed to provide robust physical protection for a wide range of general-use applications. Combining a hardened steel outer shell with a black-plated solid brass core, this padlock is engineered to withstand harsh weather conditions and aggressive physical attacks.

This specific model features an open shackle (OS) design and a convenient pop-open (POP) mechanism. Upon rotating the key 55° to 65°, the shackle automatically pops open. It is key-retaining, meaning the key remains trapped in the cylinder while the padlock is open, ensuring you never accidentally leave the lock unsecured or lose your key.

To ensure long-lasting reliability in demanding outdoor environments, the C6 is equipped with a protective dust shutter to prevent cylinder contamination and a built-in drainage hole to resist freezing and corrosion. The 6mm shackle is constructed from hardened boron alloy steel, offering exceptional resistance against cutting and sawing.

Technical Specifications

- **Body Width:** 50mm
- **Shackle Diameter:** 6mm
- **Shackle Material:** Hardened boron alloy steel

- **Body Material:** Hardened steel shell with black-plated solid brass core
- **Operation:** Rotate key 55° - 65° to unlock
- **Shackle Type:** Open shackle (OS) with pop-open (POP) mechanism
- **Key Retention:** Key-retaining (key is trapped when unlocked)

Key Features

- **High Physical Resistance:** Hardened steel outer shell protects against drilling, pulling, and physical attacks.
- **Pop-Open Shackle:** Shackle automatically pops up when unlocked for quick and easy operation.
- **Key-Retaining Design:** Prevents the key from being removed while the lock is open, ensuring the padlock is never left unlocked.
- **Weather Resistant:** Features a protective dust shutter and a drainage hole to prevent freezing and corrosion in outdoor environments.
- **Boron Alloy Shackle:** Hardened boron alloy steel shackle provides superior resistance to cutting and sawing.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
