Specification Summary

Brand	Multlock
Product type	Double Oval

Product Description

The Mul-T-Lock Garrison Double Oval Cylinder is a high-security UK oval profile cylinder designed to provide reliable protection for both residential and commercial properties. Ideal for doors requiring secure key access from both sides, this cylinder is a robust replacement or upgrade for existing UK oval lock cases.

Engineered with Mul-T-Lock's high-precision Garrison (7x7) pin tumbler mechanism, this cylinder offers excellent resistance against picking and drilling. It features a high-quality brass body and plug, a durable steel cam, and nickel silver pins for long-lasting performance.

For added convenience, these cylinders can be keyed alike or master-keyed alongside other locks in the Garrison range, including euro cylinders, rim cylinders, and padlocks. They are supplied with reversible nickel silver keys and a security code card, ensuring that duplicate keys can only be cut upon presenting the card.

A variety of sizes and finishes are available to suit your door requirements. Please select your preferred options from the drop-down menus below.

Technical Specifications

- **Profile:** UK Oval (Double Cylinder)
- **Access Type:** Key entry from both sides
- **Mechanism:** Garrison 7x7 pin tumbler system
- **Body Material:** High-quality brass
- **Pins:** Nickel silver and stainless steel
- **Cam:** Steel

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
