Is Cylinder

Product Description

The Mul-T-Lock Integrator Euro Profile Break-Secure Cylinder offers high-security protection for residential and commercial doors. Engineered to defend against common forced entry methods, this cylinder features a sacrificial break-secure section. If an intruder attempts to snap the lock, the front portion breaks away cleanly, leaving the internal locking mechanism intact and the door securely locked.

Security is further enhanced by the patented Integrator key system. Utilizing a high-precision 7-pin tumbler mechanism and a patented key blank, this system prevents unauthorised key duplication. Replacement keys can only be cut upon presentation of the unique coded security card, giving landlords and homeowners complete control over who has access.

These cylinders are highly resistant to drilling, picking, and bumping. They are available in a variety of lengths, finishes (such as Satin Steel and Brass), and configurations (including Double Key/Key and Key & Turn options). Please select your required size, finish, and configuration from the options below.

Technical Specifications

- **Cylinder Profile:** Euro profile
- **Locking Mechanism:** High-precision 7-pin tumbler
- **Key Type:** Patented dimple key
- **Security Protection:** Break-Secure (anti-snap), anti-drill, anti-pick, anti-bump
- **Key Control:** Restricted key duplication via unique coded security card
- **Finishes Available:** Satin Steel, Brass

- **Configurations:** Double (Key/Key), Key & Turn (Thumbturn)

Key Features

- **Break-Secure Design:** Sacrificial front section snaps off under attack, keeping the core mechanism intact and the door locked.
- **Patented Key Control:** Prevents unauthorised key duplication; keys can only be copied with the official security card.
- **Robust Attack Resistance:** Built-in protection against drilling, picking, and bumping.
- **Flexible Configurations:** Available in multiple sizes, finishes, and double or thumbturn options to suit your door.
- **User-Friendly Keys:** Supplied with reversible dimple keys for easy insertion and smooth operation.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
