Is Cylinder

### Product Description

The Mul-T-Lock Integrator Euro Thumb Turn Cylinder offers high-security protection combined with keyless convenience from the inside. Featuring a patented key system, this cylinder is highly popular with landlords, residential homeowners, and commercial users who require strict control over key duplication. Keys can only be copied upon presentation of the unique security code card.

Equipped with a high-precision 7-pin tumbler mechanism, the Integrator platform provides excellent resistance against picking and drilling. The thumb turn on the internal side allows for a quick and easy exit in the event of an emergency, without the need to search for a key.

This cylinder can be keyed alike or master-keyed alongside other locks in the Mul-T-Lock Integrator range, including rim cylinders, padlocks, and double cylinders, allowing you to operate multiple locks with a single key. Please choose your required size and finish from the options below.

*Please note: When selecting your size, the first measurement (prefixed with 'T') represents the internal thumb turn side (e.g., T31/31).*

## Technical Specifications

- **Cylinder Profile:** Euro profile key and turn
- **Mechanism:** High-precision 7-pin tumbler system
- **Key Security:** Patented key control (requires security card for duplication)
- **Materials:** High-quality brass body and plug, steel cam, nickel silver and stainless steel pins
- **Keys Supplied:** Supplied with 2 patented keys and a security code card (unless ordered as part of a keyed-alike set)

- **Sizing:** Internal thumb turn side is the first measurement (T)

## Key Features

- **Patented Key Protection:** Prevents unauthorized key copying for enhanced access control
- **Thumb Turn Convenience:** Allows quick, keyless egress from the inside of the property
- **Versatile Keying Options:** Can be keyed alike or master-keyed with other Mul-T-Lock Integrator locks
- **Robust Security:** High-precision pin configuration offers strong resistance to picking and drilling
- **Flexible Applications:** Ideal for residential homes, rental properties, and commercial premises

## Brand Profile

Multlock

**Mul-T-Lock** (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

### What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

### Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
