Specification Summary

Brand	Multlock
Product type	Screw In

Product Description

The Mul-T-Lock Integrator Threaded Mortice Cylinders (M7i) are high-security screw-in cylinders designed as ideal replacements for metal, steel, or aluminium doors fitted with Adams Rite or Mul-T-Lock mortice lock cases.

Utilising Mul-T-Lock's high-precision 7-pin tumbler mechanism, the Integrator platform features a patented key blank with a copy-protected oval cut and special launcher pins. This provides robust protection against unauthorised key duplication, as additional keys can only be cut by presenting the included unique key registration card.

These cylinders are highly versatile and can be built to work alongside other products in the Integrator range, including euro cylinders, Scandinavian ovals, and padlocks, allowing for a convenient keyed-alike setup.

Available in a sleek satin steel finish, these cylinders are offered in several configurations to suit your security needs. Please choose from the available options below, which include single cylinders, keyed-alike pairs, or cylinders with an integrated thumbturn.

Technical Specifications

- **Brand:** Mul-T-Lock
- **Platform:** Integrator (M7i)
- **Cylinder Type:** Threaded / Screw-In Mortice
- **Key Profile:** 348E
- **Finish:** Satin Steel

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
