Specification Summary

Brand	Multlock
Product type	Miscellaneous

Product Description

The Mul-T-Lock Interactive+ Key Switch Cylinders are designed to provide high-security key control for electrical key switches, such as those used for roller shutters, gates, alarms, and electronic access control systems. Utilising Mul-T-Lock’s patented Interactive+ (MTL600) mechanical platform, these cylinders offer exceptional resistance against picking, drilling, and unauthorised key duplication.

Each cylinder features Mul-T-Lock's unique telescopic pin tumbler system and a patented moving element on the key, ensuring that keys can only be duplicated upon presentation of a unique key registration card. This provides business and property owners with complete control over key distribution and access to their premises.

These key switch cylinders are available in multiple cylinder lengths, including 19mm, 22mm, and 29mm, all finished in high-quality nickel. Please select your required size and keying options from the options below.

Technical Specifications

- **Brand:** Mul-T-Lock
- **Key Platform:** Interactive+ (MTL600)
- **Cylinder Type:** Key Switch Cylinder
- **Available Sizes:** 19mm, 22mm, and 29mm (please select from the options below)
- **Finish:** Nickel

Key Features

- **High-Security Protection:** Built on the patented Interactive+ (MTL600) platform to deliver superior resistance to picking and drilling.
- **Patented Key Control:** Features a unique moving element on the key, preventing unauthorised key duplication without the official registration card.
- **Telescopic Pin System:** Utilises Mul-T-Lock's high-precision telescopic pin tumbler mechanism for enhanced physical security.
- **Versatile Application:** Ideal for securing electrical key switches on roller shutters, gates, alarm systems, and electronic access control.
- **Multiple Sizes Available:** Offered in 19mm, 22mm, and 29mm lengths to suit various switch housings.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
