Specification Summary

Brand	Multlock
Product type	Scandinavian Oval

Product Description

The Mul-T-Lock Interactive+ Scandinavian Oval cylinder is a high-security retrofitting solution designed specifically for ASSA and Swedish modular lock cases. Engineered to deliver exceptional physical protection and key control, this cylinder is ideal for both residential and commercial applications requiring robust security.

Operating on the patented Interactive+ platform, the cylinder utilises Mul-T-Lock's unique telescopic pin tumbler system. This advanced mechanism requires both inner and outer shear lines to align simultaneously, offering superb resistance against picking, drilling, and bumping. Additionally, the key features a moving active element that interacts with a unique pin inside the cylinder, preventing unauthorised key duplication and ensuring strict key control.

These cylinders are available as an external cylinder, an internal cylinder, or as a matching pair. Please choose your required configuration from the options below.

Technical Specifications

- **Cylinder Profile:** Scandinavian Oval (compatible with ASSA and Swedish modular lock cases)
- **Technology:** Patented Interactive+ telescopic pin tumbler system
- **Material:** High-quality brass body and plug
- **Finish:** Satin Nickel
- **Operation:** 360° rotation with operating key
- **Keying:** Reversible nickel silver keys

Key Features

- **High-Security Platform:** Patented Interactive+ technology provides advanced protection against picking, drilling, and bumping.
- **Key Control:** Features a moving element in the key to prevent unauthorised key duplication.
- **Flexible Configurations:** Available as an external cylinder, internal cylinder, or a complete pair to suit your specific door setup.
- **Retrofit Compatibility:** Designed for seamless integration with standard ASSA-type lock cases.
- **Durable Construction:** Built with high-quality brass and nickel silver pins for long-lasting reliability.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
