Specification Summary

Brand	Multlock
Product type	Screw In

Product Description

The Mul-T-Lock Interactive+ Threaded Mortice Cylinder (also known as a screw-in cylinder) offers high-security protection for commercial and residential doors. Specifically designed for metal, steel, and aluminium door applications, these cylinders thread directly into the lockcase and are commonly used with narrow-style mortice locks.

Featuring Mul-T-Lock's advanced Interactive+ patented key platform, this cylinder utilises a unique telescopic pin-within-a-pin mechanism. This high-precision design requires both internal and external shear lines to align simultaneously for the lock to operate, providing exceptional resistance against picking, bumping, and drilling.

To prevent unauthorised key duplication, the system incorporates a patented floating element within the key itself. Keys can only be copied upon presentation of the unique security card provided with the lock.

These cylinders are available in both standard key-operated and convenient thumbturn configurations to suit your security and egress requirements. Please select your preferred option from the variants below.

Technical Specifications

- **Cylinder Type:** Threaded Mortice / Screw-In Cylinder
- **Key Platform:** Mul-T-Lock Interactive+ (patented)
- **Locking Mechanism:** Telescopic pin tumbler system (pin-in-pin)
- **Application:** Suitable for metal, steel, and aluminium doors
- **Finish:** Satin Silver / Nickel
- **Key Control:** Restricted key duplication via security card

Key Features

- **High-Security Protection:** Advanced telescopic pin mechanism provides superior resistance against picking, bumping, and drilling.
- **Patented Key Control:** Features a unique floating element in the key, preventing unauthorised duplication without the registered security card.
- **Versatile Options:** Available in standard key-operated or thumbturn variants to suit your specific access and egress needs.

- **Durable Construction:** Built with high-quality brass body and steel cams for long-lasting reliability in demanding environments.
- **Seamless Retrofitting:** Ideal for securing commercial aluminium and steel doors using standard threaded mortice lockcases.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
