Specification Summary

Brand	Multlock
Product type	Double Oval

Product Description

The Mul-T-Lock Interactive+ UK Oval Dual Key Cylinder is a high-security double cylinder designed for lock cases that accept a UK oval profile. Operated by a key from both sides of the door, this cylinder is ideal for residential and commercial applications where secure dual-key access is required.

It features Mul-T-Lock's patented Interactive+ (MTL600) technology, which combines a high-precision telescopic pin tumbler mechanism with a unique patented floating element on the key. This advanced design provides exceptional resistance against picking, drilling, and bumping.

Key control is a major benefit of the Interactive+ platform. Each cylinder is supplied with a unique security card, and duplicate keys can only be cut by authorised Mul-T-Lock dealers upon presentation of this card, preventing unauthorised key copying.

This cylinder is available in multiple lengths and finishes to suit your door thickness and hardware style. Please choose your preferred size and finish from the options below.

Technical Specifications

- **Profile:** UK Oval
- **Cylinder Type:** Double cylinder (key operated on both sides)
- **Platform:** Mul-T-Lock Interactive+ (MTL600)
- **Mechanism:** Telescopic pin tumbler system
- **Available Lengths:** 66mm (33/33) and 76mm (38/38)
- **Available Finishes:** Brass and Nickel Plated

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
