Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks NE/NG Range
Keyway	MTL Padlocks NE/G

Product Description

The Mul-T-Lock NE10 Open Shackle Padlock is a high-security locking solution designed to offer robust protection for both domestic and commercial applications. Engineered to withstand aggressive physical attacks and harsh outdoor environments, this padlock is certified to CEN Grade 4, making it a dependable choice for securing gates, warehouses, and high-value assets.

Constructed with a case-hardened steel body and a 10mm hardened boron alloy steel shackle, the NE10 provides exceptional resistance against cutting, sawing, and drilling. Its double ball bearing locking mechanism ensures maximum pull resistance, while the key-retaining design guarantees that the padlock cannot be left unlocked accidentally.

Designed for reliable outdoor performance, it features a black electrophoretic finish for superior corrosion resistance, a protective shutter to prevent dust contamination, and drainage holes to stop water from freezing inside the lock.

Technical Specifications

- **Body Width:** 54mm
- **Shackle Diameter:** 10mm

- **Shackle Clearance:** 28mm (Horizontal) x 25mm (Vertical)
- **Security Rating:** CEN Grade 4
- **Body Material:** Case-hardened steel
- **Shackle Material:** Hardened boron alloy steel

Key Features

- **CEN Grade 4 Certified:** High-security rating for dependable protection against physical attacks.
- **Durable Construction:** Case-hardened steel body paired with a 10mm boron alloy steel shackle.
- **Attack Resistant:** Features built-in drill protection and a double ball bearing locking mechanism to resist pulling.
- **Weatherproof Design:** Black electrophoretic finish, dust shutter, and drainage holes to prevent freezing in cold climates.
- **Key Retaining:** The key can only be removed when the padlock is securely locked, preventing it from being left unlocked accidentally.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
