Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks NE/NG Range
Keyway	MTL Padlocks NE/G

Product Description

The Mul-T-Lock NE14 Open Shackle Padlock is an ultra-high-security locking solution designed to provide maximum protection for commercial, industrial, and high-risk domestic applications. Engineered to withstand the most determined physical attacks, this heavy-duty padlock achieves the prestigious CEN Grade 6 and Sold Secure Diamond certifications, representing the pinnacle of security standards.

Constructed with a robust case-hardened steel body and a 14mm open shackle made from hardened boron alloy steel, the NE14 offers exceptional resistance against bolt cutters, sawing, and drilling. Security is further enhanced by a double ball bearing locking mechanism, which provides high resistance to pulling and prying, while the key-retaining design ensures the padlock cannot be left unlocked.

At its core, the padlock features the patented MTL300 cylinder platform. Utilising a unique telescopic pin system, it delivers advanced protection against picking, bumping, and drilling. To prevent unauthorised key duplication, each padlock is supplied with a security card, ensuring duplicate keys can only be cut by authorised dealers.

Built to perform in harsh outdoor environments, the NE14 is finished with a durable black electrophoretic coating. It also features a protective shutter to keep dust and dirt out of the keyway, alongside drainage holes to prevent freezing.

Technical Specifications

- **Body Width:** 66mm
- **Shackle Diameter:** 14mm
- **Body Material:** Case-hardened steel
- **Shackle Material:** Hardened boron alloy steel
- **Security Ratings:** CEN Grade 6, Sold Secure Diamond
- **Cylinder Platform:** Patented MTL300
- **Locking Mechanism:** Double ball bearing
- **Finish:** Black electrophoretic

Key Features

- **CEN Grade 6 & Sold Secure Diamond:** Certified to the highest security standards for maximum protection.
- **14mm Boron Alloy Shackle:** Hardened steel construction offers extreme resistance to bolt cutters and sawing.
- **Patented MTL300 Cylinder:** Advanced telescopic pin system provides excellent protection against picking, bumping, and drilling.
- **Strict Key Control:** Supplied with a security card to prevent unauthorised key duplication.
- **Double Ball Bearing Locking:** Highly resistant to pulling, prying, and physical attacks.
- **Weather Resistant Design:** Features a protective dust shutter, drainage holes to prevent freezing, and a durable electrophoretic finish.
- **Key Retaining:** Ensures the key can only be removed when the padlock is securely locked.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
