Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks NE/NG Range
Keyway	MTL Padlocks NE/G

Product Description

The Mul-T-Lock NG10 Open Shackle Padlock is a heavy-duty, high-security padlock designed to provide robust protection for both commercial and general applications. Certified to CEN Grade 3, this padlock offers an exceptional balance of physical strength and weather resistance, making it an ideal choice for securing gates, warehouses, machinery, and high-value assets.

Constructed with a case-hardened steel body and a 10mm hardened boron alloy steel shackle, the NG10 provides formidable resistance against cutting, sawing, and physical attacks. The shackle is secured by a double ball bearing locking mechanism, ensuring maximum resistance against pulling and prying.

Engineered to withstand harsh outdoor environments, the padlock features a black electrophoretic finish for superior corrosion resistance. It is equipped with integrated drainage holes to prevent water accumulation and freezing, alongside a protective dust shutter that shields the cylinder from dirt and debris contamination. Additionally, the key-retaining design ensures the padlock cannot be left unlocked by mistake.

Technical Specifications

- **CEN Rating:** CEN Grade 3
- **Shackle Diameter:** 10mm

- **Shackle Material:** Hardened boron alloy steel
- **Body Material:** Case-hardened steel
- **Finish:** Black electrophoretic
- **Locking Mechanism:** Double ball bearing
- **Key Retention:** Key retaining (key cannot be removed when unlocked)
- **Cylinder Compatibility:** Compatible with Mul-T-Lock high-precision cylinder platforms (NE/G Keyway)

Key Features

- **High-Security Protection:** CEN Grade 3 certified for reliable security in general and commercial applications.
- **Attack Resistant:** Hardened boron alloy steel shackle and case-hardened steel body resist cutting, sawing, and physical force.
- **Double Ball Bearing Locking:** Delivers maximum resistance against pulling and prying attacks.
- **All-Weather Reliability:** Black electrophoretic finish provides excellent corrosion resistance.
- **Anti-Freeze & Anti-Dust:** Integrated drainage holes prevent water freezing, while a protective shutter shields the cylinder from dust and dirt.
- **Key Retaining Design:** Ensures the padlock is never accidentally left unlocked.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
