Specification Summary

Brand	Multlock
Product type	Mul-T-Lock Padlocks NE/NG Range
Keyway	MTL Padlocks NE/G

Product Description

The Mul-T-Lock SBNG10 (NG10SB) Sliding Shackle Padlock is a high-security locking solution designed to provide robust protection for residential, commercial, and general applications. Featuring a unique sliding bolt design, this padlock is ideal for securing gates, shutters, barriers, and chains where tight clearance or alignment makes standard shackles impractical.

Engineered to withstand harsh outdoor environments, the SBNG10 is built with a case-hardened steel body and a 10mm hardened boron alloy steel shackle. Its black electrophoretic finish provides exceptional corrosion resistance, while integrated drainage holes prevent the lock from freezing in cold weather. A protective shutter is also incorporated to keep dust, dirt, and moisture out of the cylinder mechanism.

Security is at the core of this padlock, which is certified to CEN Grade 3 and rated Sold Secure Bronze. It utilizes a double ball bearing locking mechanism to resist pulling and twisting attacks, alongside Mul-T-Lock's high-precision cylinder technology for advanced resistance against picking, bumping, and drilling.

Technical Specifications

- **Body Material:** Case-hardened steel
- **Shackle Material:** Hardened boron alloy steel

- **Shackle Diameter:** 10mm
- **Security Rating:** CEN Grade 3 / Sold Secure Bronze
- **Locking Mechanism:** Double ball bearing
- **Finish:** Black electrophoretic
- **Key Retention:** Non-key retaining (key can be removed when unlocked)

Key Features

- **Sliding Shackle Design:** Ideal for tight clearances, gates, shutters, barriers, and chains where standard shackles are impractical.
- **High-Security Certification:** Independently tested and certified to CEN Grade 3 and Sold Secure Bronze standards.
- **Weatherproof Construction:** Features a durable black electrophoretic finish, built-in drainage holes, and a protective dust shutter to withstand harsh outdoor conditions.
- **Advanced Attack Resistance:** Double ball bearing locking mechanism resists pulling and twisting, while the high-precision cylinder protects against picking, bumping, and drilling.
- **Flexible Keying Options:** Compatible with high-security Mul-T-Lock key platforms, allowing integration into keyed-alike or master key systems.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
