Specification Summary

Brand	Paxton
Product type	Net2

Product Description

The Paxton 695-150 MIFARE Classic 4K Proximity Keyfobs offer a highly secure, compact, and reliable solution for modern access control systems. Supplied in a convenient pack of 10, these robust keyfobs are designed for seamless integration with Paxton Net2 readers, as well as compatible third-party readers utilising MIFARE technology.

Each keyfob is manufactured from durable polycarbonate and comes complete with a metal split ring, making it easy to attach to keyrings, lanyards, or ID badge holders. With an operating frequency of 13.56 MHz and a generous 4K memory capacity, they provide excellent data retention and reliable performance in demanding environments.

Programming is straightforward: simply enter the user's details into the Net2 PC software, present the fob to a desktop reader to register its unique ID, and the token is ready for use. When presented to an active reader, access permissions are instantly verified to grant or deny entry, ensuring smooth and efficient security management for commercial, educational, or residential premises.

Technical Specifications

- **Manufacturer:** Paxton
- **Part Number:** 695-150
- **Technology:** MIFARE Classic® (4K)
- **Operating Frequency:** 13.56 MHz
- **Memory Size:** 4KB
- **Data Retention:** 10 years
- **Operating Temperature:** -20°C to +85°C
- **Material:** Polycarbonate (PC)
- **Dimensions:** 40mm (H) x 31mm (W)
- **Pack Quantity:** 10 keyfobs

Key Features

- **Seamless Compatibility:** Designed for use with Paxton Net2 readers and third-party readers utilising MIFARE technology.

Brand Profile

Paxton

Paxton is a UK **access control** manufacturer based in **Brighton**, best known for making “security made simple” systems that sit in the sweet spot between **installer-friendly** and **properly scalable**. They design and manufacture their own kit (controllers, readers, credentials, door entry, wireless door handles), and their systems are used to secure **~30,000 buildings each year** across **60+ export countries**.

The company’s roots go back to the mid-80s: **Paxton Access Limited** was incorporated on **22 January 1985**, and the brand points to early products like the **TOUCHLOCK keypad** as part of the origin story that grew into today’s access-control portfolio.

Product-wise, Paxton is mainly known for:

- **Net2** – their networked access control system, centrally administered from one or more PCs and built to scale across multiple doors/sites.
- **Paxton10** – their more modern platform alongside Net2, positioned as a step up in capability (and where they’re pushing higher-security credential tech).
- Plus simpler options like **Standalone / Switch2** for smaller jobs where you want the door secured without turning the install into a networking saga.
