Specification Summary

Brand	Paxton
Product type	Compact & Switch2

Product Description

The Paxton Compact / Switch2 Proximity Key Fobs are designed for use with Paxton PROXIMITY compact, Easyprox compact, and Switch2 access control systems. These high-quality proximity fobs offer a secure, contactless entry solution for commercial and residential properties, making access management simple and efficient.

This system uses an intuitive 'shadow card' management system. Each key fob is supplied with a corresponding shadow card, allowing you to easily manage and track user credentials. If a key fob is lost or stolen, it can be quickly voided by presenting its corresponding shadow card to any reader on the system, preventing unauthorised access

without needing to reprogram the entire system.

These key fobs are available in a choice of finishes, pack quantities, weights, and manufacturer references. Please select your preferred options from the choices below.

Technical Specifications

- Brand: Paxton
- Compatibility: PROXIMITY compact, Easyprox compact, and Switch2 systems
- Fob Length: 40mm
- Finish: Amber, Green, or Red (please choose from the options below)
- Pack Quantity: 10, 50, or 100 fobs (please choose from the options below)
- Manufacturer Reference: 820-010A, 820-010G, 820-010R, 820-050A, 820-050G, 820-050R, or 820-100A (please choose from the options below)
- Weight: Range of 610g to 1.275kg (please choose from the options below)
- Barcode: Multiple options available (please choose from the options below)
- Packaging: Boxed

Key Features

- Contactless proximity entry for quick and convenient access control
- Intuitive 'shadow card' system for simple user management
- Lost or stolen key fobs can be easily voided using the corresponding shadow card
- Supplied with a convenient wallet for storing shadow cards
- All user fobs are valid and ready to use immediately after enrolment
- Choice of ring colours to support colour-coded zoning or branding requirements

Brand Profile

Paxton

Paxton is a UK **access control** manufacturer based in **Brighton**, best known for making “security made simple” systems that sit in the sweet spot between **installer-friendly** and **properly scalable**. They design and manufacture their own kit (controllers, readers, credentials, door entry, wireless door handles), and their systems are used to secure **~30,000 buildings each year** across **60+ export countries**.

The company’s roots go back to the mid-80s: **Paxton Access Limited** was incorporated on **22 January 1985**, and the brand points to early products like the **TOUCHLOCK keypad** as part of the origin story that grew into today’s access-control portfolio.

Product-wise, Paxton is mainly known for:

- **Net2** – their networked access control system, centrally administered from one or more PCs and built to scale across multiple doors/sites.
- **Paxton10** – their more modern platform alongside Net2, positioned as a step up in capability (and where they’re pushing higher-security credential tech).
- Plus simpler options like **Standalone / Switch2** for smaller jobs where you want the door secured without turning the install into a networking saga.
