Specification Summary

Brand	Paxton
Product type	Paxton

Product Description

The Paxton PaxLock Pro is a highly versatile, battery-powered access control solution integrated into a stylish, robust door handle. This intelligent wireless lockset can operate as a standalone unit or seamlessly integrate into a networked Net2 or Paxton10 system (when paired with the appropriate bridge), offering a flexible upgrade path as your security requirements grow.

Designed to suit a variety of installation environments, the PaxLock Pro is available in multiple configurations. Customers can choose between a sleek Black or White scratch-resistant finish, as well as dedicated Internal or IP55-rated weather-resistant External versions. Please select your preferred finish, IP rating, and manufacturer reference from the options below.

Engineered for reliability and ease of installation, the PaxLock Pro is certified for use on FD30 and FD60 single fire doors. It features exceptional energy efficiency, delivering over two years of battery life (up to 55,000 operations) from a single set of four AA batteries. It also supports multi-token technology, allowing compatibility with a wide range of credential types.

Technical Specifications

- **Backset:** 44mm
- **Power Supply:** 4 x AA batteries
- **Battery Life:** 55,000 operations (in excess of 2 years)
- **Handing:** Reversible
- **Dimensions:** 64mm (W) x 37mm (D)
- **Weight:** 2.165kg
- **Format / Mechanism:** Proximity
- **Visual Indication:** Yes
- **IP Rating:** Available in Internal or IP55 (External) options (please choose below)
- **Finish:** Available in Black or White (please choose below)
- **Manufacturer References:** 900-600BL, 900-600WT, 900-610BL, or 900-610WT (please choose below)

Key Features

- **Flexible Operation:** Works standalone or integrates with Net2 and Paxton10 systems (with applicable bridge)
- **Fire Door Certified:** Certified for use on FD30 and FD60 single fire doors
- **Weather Resistance:** External version is IP55 rated for outdoor durability
- **Scratch-Resistant:** Durable coating keeps the handle looking smart and professional
- **Multi-Token Compatibility:** Supports Paxton, EM4100/02, MIFARE®, MIFARE® Classic, MIFARE® DESFire® EV1, MIFARE® Plus, MIFARE® Ultralight, MIFARE® Ultralight C, MIFARE® Mini, and HID® Prox (activation required)
- **Simple Installation:** Easy to install and maintain on standard doors

Brand Profile

Paxton

Paxton is a UK **access control** manufacturer based in **Brighton**, best known for making “security made simple” systems that sit in the sweet spot between **installer-friendly** and **properly scalable**. They design and manufacture their own kit (controllers, readers, credentials, door entry, wireless door handles), and their systems are used to secure **~30,000 buildings each year** across **60+ export countries**.

The company’s roots go back to the mid-80s: **Paxton Access Limited** was incorporated on **22 January 1985**, and the brand points to early products like the **TOUCHLOCK keypad** as part of the origin story that grew into today’s access-control portfolio.

Product-wise, Paxton is mainly known for:

- **Net2** – their networked access control system, centrally administered from one or more PCs and built to scale across multiple doors/sites.
- **Paxton10** – their more modern platform alongside Net2, positioned as a step up in capability (and where they’re pushing higher-security credential tech).
- Plus simpler options like **Standalone / Switch2** for smaller jobs where you want the door secured without turning the install into a networking saga.
