Specification Summary

Brand	PJB
Product type	Ground Anchor

Product Description

The PJB Bike Anchor (PJB506) is a robust, British-made security anchor designed to provide a reliable, cost-effective locking point for your valuable outdoor equipment. Ideal for securing bicycles, scooters, quad bikes, ride-on lawnmowers, ladders, and plant machinery, this versatile anchor can be securely mounted to either the floor or the wall.

Constructed from solid steel with a durable red powder-coated finish, the anchor is built to withstand both physical attacks and harsh weather conditions. It features a clearance that accommodates any security chain or U-lock up to 13mm in diameter.

For maximum security, the PJB506 is supplied complete with a heavy-duty fixing kit containing two M10 x 70mm countersunk security fixing screws and shield anchors. These fixings include special steel ball inserts that are hammered flush into the screw heads once installed, preventing the anchor from being unscrewed or tampered with by thieves.

Technical Specifications

- **Brand:** PJB
- **Manufacturer Reference:** PJB506
