Specification Summary

Brand	PJB
Product type	Ground Anchor

Product Description

The PJB Ground Bridge Anchor (PJB509) is a heavy-duty, British-made security anchor designed to provide robust protection for high-value assets. Ideal for securing motorcycles, scooters, bicycles, quad bikes, and garden machinery, this versatile anchor can be securely fitted to either concrete floors or brick walls.

Constructed with a unique double-bridge design, it features solid steel construction finished in a highly visible, durable red powder coating. It is designed to accommodate security chains and U-locks up to 13mm in diameter, offering physical resistance against attack.

For maximum peace of mind, the PJB Ground Bridge Anchor is Sold Secure Gold approved. It is supplied complete with comprehensive fitting instructions and a high-security fixing kit, which includes four M10 x 70mm countersunk security fixing screws, shield anchors, and steel ball inserts to prevent unauthorised removal once installed.
