Specification Summary

Brand	Ronis
Product type	Furniture Lock

Product Description

The RONIS 32300 Single Flange Pedestal Lock is a robust and reliable locking solution designed specifically for office furniture, such as tambour units and pedestal desks. Cast from high-quality materials with a bright nickel finish, this lock features a round face and is secured in place using a screw fixing. It utilises a dependable wafer mechanism and is part of the popular SM key series, offering up to 200 different key combinations.

This lock is available in multiple configurations, including Keyed Alike or Master Keyed options, with different manufacturer references and specifications to suit your requirements. Please choose your preferred keying option

and manufacturer reference from the options below.

Brand Profile

Ronis

RONIS is an industrial locking brand best known for the unglamorous-but-essential stuff that keeps the modern world closed: **cam locks, quarter-turn locks, enclosure locks, locker/furniture locks**, and other OEM-friendly locking components used in **electrical cabinets, switchgear, lockers, vending/utility enclosures, postal equipment, and industrial furniture**. It's the kind of brand you don't notice until a whole site can't open a cabinet, and then suddenly it's the main character.

Today, **RONIS is a brand within the DOM Security group** (often referenced as **DOM RONIS**), and it's positioned as one of the major players in **industrial locks and mechanical components** for manufacturers.

What RONIS is really about is **OEM / turnkey supply**: providing manufacturers with ready-to-integrate locking solutions rather than one-off "retail" locks. DOM's own positioning for DOM RONIS is explicitly **designing, manufacturing and marketing OEM security systems for industry** and delivering **turnkey solutions**.

On the product side, the brand is heavily associated with **robust cam lock families**—e.g., models like the RONIS **8800 / 32150 / 1710** ranges are described as cast, one-piece bodies aimed at durability and proven performance (the "this cabinet will be opened 12,000 times and nobody will lubricate it" design philosophy).
