Specification Summary

Brand	Ronis
Product type	Furniture Lock

Product Description

The RONIS 6900 Square Claw Drawer Furniture Lock is a robust and reliable locking solution designed for wooden furniture, including drawers, cabinets, and tambour units. Finished in a high-quality bright nickel, this square-faced claw lock offers a clean, professional appearance that blends seamlessly with modern office and home furniture.

This lock features a wafer mechanism and is supplied under the popular SM Master Key Series, offering up to 200 key combinations (differs) for enhanced security. It is supplied complete with two keys. The key operates with a 45-degree rotation to unlock and can be conveniently removed in the upright 12 o'clock position.

Installation is straightforward thanks to the pre-drilled 4 x 3.6mm screw fixing holes on a 31mm screw centre layout, ensuring a secure and stable fit. With a 22mm nozzle length, it is perfectly suited for timber panels and drawers up to 22mm thick.

Technical Specifications

Brand Profile

Ronis

RONIS is an industrial locking brand best known for the unglamorous-but-essential stuff that keeps the modern world closed: **cam locks, quarter-turn locks, enclosure locks, locker/furniture locks**, and other OEM-friendly locking components used in **electrical cabinets, switchgear, lockers, vending/utility enclosures, postal equipment, and industrial furniture**. It's the kind of brand you don't notice until a whole site can't open a cabinet, and then suddenly it's the main character.

Today, **RONIS is a brand within the DOM Security group** (often referenced as **DOM RONIS**), and it's positioned as one of the major players in **industrial locks and mechanical components** for manufacturers.

What RONIS is really about is **OEM / turnkey supply**: providing manufacturers with ready-to-integrate locking solutions rather than one-off "retail" locks. DOM's own positioning for DOM RONIS is explicitly **designing, manufacturing and marketing OEM security systems for industry** and delivering **turnkey solutions**.

On the product side, the brand is heavily associated with **robust cam lock families**—e.g., models like the RONIS **8800 / 32150 / 1710** ranges are described as cast, one-piece bodies aimed at durability and proven performance (the "this cabinet will be opened 12,000 times and nobody will lubricate it" design philosophy).
