Specification Summary

Brand	Ronis
Product type	Furniture Lock

Product Description

The RONIS 72300 Flange Fix Pedestal Furniture Lock is a high-quality locking solution designed for office pedestal furniture, drawers, and wooden cabinets up to 19mm thick. Featuring a round face and a robust wafer mechanism, this lock is designed for secure, single-point screw fixing.

The lock operates with a 180° clockwise and anti-clockwise movement, and the key can be conveniently removed in both the locked and unlocked positions. It is supplied with 2 keys and is compatible with the SM master key series, offering up to 200 key combinations.

This pedestal lock is available in multiple options, including Keyed Alike (KA) or Keyed to Differ (KD) configurations. Please select your preferred keying option and manufacturer reference from the options below.

Brand Profile

Ronis

RONIS is an industrial locking brand best known for the unglamorous-but-essential stuff that keeps the modern world closed: **cam locks, quarter-turn locks, enclosure locks, locker/furniture locks**, and other OEM-friendly locking components used in **electrical cabinets, switchgear, lockers, vending/utility enclosures, postal equipment, and industrial furniture**. It's the kind of brand you don't notice until a whole site can't open a cabinet, and then suddenly it's the main character.

Today, **RONIS is a brand within the DOM Security group** (often referenced as **DOM RONIS**), and it's positioned as one of the major players in **industrial locks and mechanical components** for manufacturers.

What RONIS is really about is **OEM / turnkey supply**: providing manufacturers with ready-to-integrate locking solutions rather than one-off "retail" locks. DOM's own positioning for DOM RONIS is explicitly **designing, manufacturing and marketing OEM security systems for industry** and delivering **turnkey solutions**.

On the product side, the brand is heavily associated with **robust cam lock families**—e.g., models like the RONIS **8800 / 32150 / 1710** ranges are described as cast, one-piece bodies aimed at durability and proven performance (the "this cabinet will be opened 12,000 times and nobody will lubricate it" design philosophy).
