Specification Summary

Brand	Ronis
Product type	Nut Fix

Product Description

The RONIS 8800 Nut Fix Master Keyed Mini Camlock is a compact and highly reliable locking solution designed for applications such as metal furniture, lockers, and cabinets. Utilising a robust wafer mechanism, this camlock offers a secure yet cost-effective security solution. It is supplied under the SM Master Key series, allowing for seamless integration into new or existing master key systems.

Featuring a compact 8.5mm body length, this mini camlock is ideal for installations where space is limited. It is secured in place using a convenient nut fixing method, ensuring a stable and durable fit. The lock operates with a 180° clockwise and anti-clockwise movement, providing flexible operation, and is finished in a clean bright nickel.

This model is compatible with the Ronis 4929 cam series and comes complete with two keys.

Brand Profile

Ronis

RONIS is an industrial locking brand best known for the unglamorous-but-essential stuff that keeps the modern world closed: **cam locks, quarter-turn locks, enclosure locks, locker/furniture locks**, and other OEM-friendly locking components used in **electrical cabinets, switchgear, lockers, vending/utility enclosures, postal equipment, and industrial furniture**. It's the kind of brand you don't notice until a whole site can't open a cabinet, and then suddenly it's the main character.

Today, **RONIS is a brand within the DOM Security group** (often referenced as **DOM RONIS**), and it's positioned as one of the major players in **industrial locks and mechanical components** for manufacturers.

What RONIS is really about is **OEM / turnkey supply**: providing manufacturers with ready-to-integrate locking solutions rather than one-off "retail" locks. DOM's own positioning for DOM RONIS is explicitly **designing, manufacturing and marketing OEM security systems for industry** and delivering **turnkey solutions**.

On the product side, the brand is heavily associated with **robust cam lock families**—e.g., models like the RONIS **8800 / 32150 / 1710** ranges are described as cast, one-piece bodies aimed at durability and proven performance (the "this cabinet will be opened 12,000 times and nobody will lubricate it" design philosophy).
