Brand	Samuel Heath
Product type	Concealed

Product Description

The Samuel Heath Perko R2 Concealed Door Closer is the original and trusted chain-link door closer, providing an economical and highly discreet solution for automatic door closing. Designed to be mortiсed into the door jamb, it remains completely hidden from view when the door is closed, with only the anchor plate and precision-engineered chain visible when open. This makes it an ideal choice for maintaining clean, uninterrupted door lines in both modern and traditional interiors.

Engineered for light to medium-duty applications, the Perko R2 is suitable for internal doors weighing up to 50kg. It features rectangular faceplates for a neat, flush installation, along with solid brass round anchor plates and a durable powder-coated mechanism housing. Built to last, it has been tested to withstand 500,000 open and close cycles, ensuring reliable, long-term performance.

Additionally, this closer is fire tested and has been incorporated in doors tested to BS476 Part 22 1987, proving it does not affect the integrity of latched 1/2-hour and 1-hour fire doors.

Technical Specifications
