Product Description

The Securefast SBL320 Easy Change Digital Lock with Tubular Latch & Holdback is a reliable, keyless security solution designed for low to medium-traffic areas such as offices, storerooms, and workshops. Constructed with a robust zinc die-cast body, this mechanical digital lock offers a secure and convenient way to restrict access without the hassle of keys or cards.

A standout feature of the SBL320 is its "Easy Code" mechanism. Unlike traditional digital locks that require fiddly tumbler changes, the SBL320 allows you to quickly update the code by simply rotating the dials on the back of the unit with a screwdriver. It also features a holdback facility on the internal unit, allowing you to temporarily disable the locking mechanism for unrestricted passage when required.

Designed for versatility, this non-handed lock is suitable for both left and right-handed timber doors between 35mm and 65mm thick. It is fully weather-resistant, having been successfully tested to EN1670 for external use, and comes complete with protective black neoprene seals.

Technical Specifications

- **Brand:** Securefast
- **Manufacturer Reference:** SBL320/S
- **Lock Type:** Mechanical digital lock with tubular latch
- **Finish:** Satin Chrome
- **Body Material:** Zinc die-cast
- **Backset:** 60mm
