Brand	SILCA
Product type	Miscellaneous

Product Description

The SILCA AntiGrip Graphite Lubricant is a high-quality dry powder lubricant specifically designed for lock cylinders and other delicate mechanisms where wet, oily lubricants are unsuitable. This grease-free, odourless formula ensures that internal components - such as lock pins and springs - continue to operate smoothly and reliably without attracting dust or dirt.

Highly weather-resistant, this natural graphite powder also doubles as an effective antifreeze. Because it cannot freeze, it is the ideal choice for maintaining external padlocks, car locks, and outdoor cylinders during cold winter months. The bottle features a built-in applicator for precise, mess-free delivery directly into the keyway.

Technical Specifications

- **Brand:** SILCA
- **Manufacturer Reference:** AVK404081
- **Barcode:** 8003737911603
- **Weight:** 172g
- **Pack Quantity:** 1

Key Features

- **Dry Graphite Formula:** Specially formulated for lock cylinders and mechanisms where wet lubricants cannot be used.
- **Smooth Operation:** Helps ensure internal pins and springs continue to work smoothly, preventing wear and sticking.
- **Weather Resistant:** Grease-free, odourless, and repels water without attracting dust.
- **Antifreeze Properties:** Will not freeze in cold weather, making it ideal for external padlocks and vehicle locks.
- **Built-In Applicator:** Designed for precise, clean application directly into the keyway.
