Specification Summary

Brand	Squire
Product type	Sliding Shackle

Product Description

The Squire ASWL Steel Sliding Shackle Padlock is a robust security solution specifically designed for commercial premises, warehouses, garages, and industrial units. It features a solid brass body encased in a hardened, steel-plated armoured jacket, providing exceptional resistance to physical attacks.

A standout feature is the rotating hardened steel shackle, which spins when attacked to resist sawing. Equipped with a reliable 5-pin tumbler mechanism, this padlock offers dependable security for roller shutter doors, containers, and commercial vehicles.

This padlock is available in multiple sizes and configurations, with body widths of 60mm or 80mm, body thicknesses of 25mm or 30mm, and shackle diameters of 10mm or 11mm. Please choose your preferred size, clearance, and weight from the options below.

Technical Specifications

- **Brand:** Squire
- **Body Material:** Steel-plated brass
- **Body Width:** 60mm or 80mm (please choose from the options below)
- **Body Thickness:** 25mm or 30mm (please choose from the options below)

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
