## Product Description

The Squire GA7 Heavy Duty Ground Anchor is a high-security locking point designed to provide robust protection for motorcycles, e-bikes, and other high-value equipment. Ideal for use in garages, sheds, and domestic properties, this heavy-duty anchor is suitable for both internal and external installations on brick or concrete surfaces.

Manufactured from 5mm hardened steel, the GA7 features a resilient blue powder-coated finish to withstand the elements. It is designed to accommodate security chains with a link diameter of up to 19mm, making it compatible with a wide range of heavy-duty security chains. The anchor is supplied complete with security fixings, including anti-theft security bolts, ensuring a straightforward and highly secure installation.

With Sold Secure Motorcycle Gold approval and Secured by Design status (licence held by Squire), this ground anchor offers reliable, police-approved security to give you peace of mind at home.

# Brand Profile

Squire

**Squire** (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

## What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
