Specification Summary

Brand	Squire
Product type	Body Only

Product Description

The Squire LS64 Stronghold Long Shackle Padlock Body Only (manufacturer reference SS50EM/2.5) is a high-security padlock designed for use in maximum-risk situations and harsh environments. Featuring a solid hardened steel body and a hardened boron alloy steel shackle, this padlock is tested to CEN Grade 4 and CBS EN Grade 3 standards, offering outstanding resistance against physical attack.

This Euro profile 'E' version of the Stronghold padlock is purpose-designed to accommodate any modified 71mm double Euro profile cylinder without the need for drilling. This makes it an ideal choice for integrating into an existing master key system or for cost-effective lock maintenance, as the cylinder can be replaced or rekeyed without replacing the entire padlock body.

The padlock features an electrophoretic finish for excellent corrosion resistance, making it highly durable in outdoor and demanding conditions. Please note that this is the padlock body and shackle only; the Euro cylinder is sold separately.

Technical Specifications

- **Brand:** Squire
- **Manufacturer Reference:** SS50EM2.5
- **Body Width:** 50mm
- **Body Thickness:** 26mm
- **Shackle Diameter:** 10mm
- **Vertical Clearance:** 65mm
- **Horizontal Clearance:** 22mm
- **Material:** Solid hardened steel body with a hardened boron alloy steel shackle
- **Finish:** Electrophoretic
- **Standards:** CEN Grade 4, CBS EN Grade 3
- **Mechanism:** Euro Double Cylinder (71mm Modified)
- **Weight:** 500g

Key Features

- **High-Security Design:** Tested to CEN Grade 4 and CBS EN Grade 3 for maximum protection in high-risk environments.
- **Euro Cylinder Compatible:** Designed to easily fit any modified 71mm double Euro profile cylinder without drilling, making it ideal for master key integration.
- **Corrosion Resistant:** Electrophoretic finish provides excellent resistance against harsh weather and outdoor elements.
- **Long Shackle:** Hardened boron alloy steel shackle with a 65mm vertical clearance for versatile locking applications.
- **Cost-Effective Maintenance:** Padlock body only allows you to change or upgrade the locking mechanism without replacing the entire padlock.

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
