Specification Summary

Brand	Squire
Product type	Combination

Product Description

The Squire SHCB Sliding Shackle Combination Padlock is a heavy-duty, high-security lock designed to withstand tough attacks and harsh weather conditions. Constructed with a solid brass body and hardened internal parts, this padlock features a protective dark blue plastic cover and a hardened steel sliding shackle for exceptional resistance against cutting and sawing.

Ideal for securing sheds, garages, commercial vehicles, substations, perimeter gates, trailers, and storage units, the SHCB series offers keyless convenience with a recodable combination. It features a patented 'pull' button mechanism for easy opening.

This padlock is available in a range of options to suit your security needs. You can choose from body widths of 65mm or 75mm, shackle diameters of 11mm or 12.7mm, and weights ranging from 430g to 840g. The locking mechanism is available in either a 4-wheel combination (providing 10,000+ codes) or a 5-wheel combination (providing 100,000+ codes). Depending on your requirements, options include boxed, bagged, or visi-packed options, with some models featuring a chain attachment. Please select your preferred body width, shackle diameter, mechanism, packaging, and manufacturer reference from the options below.

Technical Specifications

- **Body Width:** 65mm or 75mm (please choose from options below)
- **Body Thickness:** 19mm
- **Shackle Diameter:** 11mm or 12.7mm (please choose from options below)
- **Mechanism:** 4-wheel or 5-wheel combination (please choose from options below)
- **Combinations:** 10,000+ or 100,000+ (please choose from options below)
- **Weight:** 430g to 840g (please choose from options below)
- **Keying:** Keyed to differ
- **Body Material:** Solid brass with hardened internal parts
- **Shackle Material:** Hardened steel

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
