Specification Summary

Brand	Squire
Product type	Body Only

Product Description

The Squire SS Stronghold SS50CEM and SS65CEM Steel Euro Profile Closed Shackle Padlocks are designed for maximum risk situations and harsh environments. Featuring a solid hardened steel body and a hardened boron alloy steel shackle, these padlocks offer exceptional resistance against picking, drilling, sawing, and other physical attacks.

These 'body only' versions are purpose-designed for easy and secure fitment of an SC65 padlock insert or a modified 71mm double Euro profile cylinder, with no drilling required. This makes them ideal for integration into a master key system, allowing you to change the locking mechanism cost-effectively without replacing the entire padlock.

These padlocks are available in body widths of 50mm or 65mm, with shackle diameters of 10mm or 12.7mm, and body thicknesses ranging from 26mm to 31.8mm. Depending on the model selected, they meet CEN Grade 4 or CEN Grade 6 standards. Please choose your preferred size, security level, and packaging option from the selection below.

Technical Specifications

- **Manufacturer Reference:** SS50CEM or SS65CEM (please choose from the options below)
- **Body Width:** 50mm or 65mm (please choose from the options below)
- **Body Thickness:** 26mm or 31.8mm (please choose from the options below)
- **Shackle Diameter:** 10mm or 12.7mm (please choose from the options below)
- **Horizontal Clearance:** 16mm
- **Vertical Clearance:** 16mm
- **Mechanism:** Euro Double Cylinder (71mm Modified)
- **Standards:** CEN Grade 4 / CBS EN Grade 4 to CEN Grade 6 / CBS EN Grade 5 (depending on model chosen)
- **Weight:** 560g to 1.01Kg (depending on model chosen)
- **Packaging:** Boxed or Visi (please choose from the options below)

Key Features

- **High Security:** Solid hardened steel body and hardened boron alloy steel shackle offer excellent resistance to picking, drilling, sawing, and other forms of attack.
- **Euro Profile Cylinder Compatible:** Accepts an SC65 padlock insert or a modified 71mm double Euro profile cylinder with no need to drill.
- **Master Key Integration:** Ideal for master key systems, allowing cost-effective cylinder replacement without replacing the entire padlock.
- **Corrosion Resistant:** Electrophoretic finish provides excellent protection against harsh environments.
- **Closed Shackle Design:** Offers extra protection against shackle attack.
- **Body & Hasp Only:** Supplied without a cylinder, allowing you to fit your own choice of locking mechanism.

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
