Specification Summary

Brand	Squire
Product type	Body Only

Product Description

The SQUIRE SS100 Stronghold Closed Shackle Padlock Body Only is a seriously heavy-duty security solution designed to withstand extreme, sustained attacks. Constructed with a solid hardened steel lock body and a hardened boron alloy steel shackle, this ultra-high-security padlock is capable of resisting a tensile pull of over 24 tonnes.

This closed shackle padlock body is finished with an electrophoretic coating, providing exceptional corrosion resistance that has been salt spray tested for over 200 hours. It is ideal for commercial premises and high-risk environments, being the only padlock to achieve the prestigious Loss Prevention Certification Board (LPCB) SR4 standard alongside a CEN Grade 6 rating.

As a 'body only' version, it is specifically designed to accept Evva ICS and EPS KIK-SS cylinders (supplied separately). This allows for seamless integration into existing master key systems and offers a cost-effective way to rekey or replace the locking mechanism without needing to replace the entire padlock body.

Technical Specifications

- **Body Width:** 100mm
- **Body Material:** Solid hardened steel
- **Shackle Material:** Hardened boron alloy steel
- **Shackle Type:** Closed shackle
- **Cylinder Compatibility:** Accepts Evva ICS and EPS KIK-SS cylinders (cylinders sold separately)
- **Standards & Certifications:** CEN Grade 6, Loss Prevention Certification Board (LPCB) SR4 Standard
- **Corrosion Resistance:** Electrophoretic finish, salt spray tested for over 200 hours
- **Tensile Pull Resistance:** Over 24 tonnes
- **Weight:** 3.105kg
- **Manufacturer Reference:** ALD/SS100CS/BO

Key Features

- **Extreme Attack Resistance:** Solid hardened steel body and boron alloy shackle withstand up to 24 tonnes of tensile pull.
- **LPCB SR4 & CEN Grade 6 Certified:** Meets the highest industry standards for maximum security in commercial and high-risk environments.
- **Closed Shackle Design:** Minimises shackle exposure to protect against cutting, cropping, and sawing attacks.
- **Exceptional Weatherproofing:** Electrophoretic finish provides superior corrosion resistance, proven by over 200 hours of salt spray testing.
- **Flexible Cylinder Integration:** Designed to house Evva ICS and EPS KIK-SS cylinders, making it perfect for master key suites.
- **Cost-Effective Maintenance:** Allows the locking mechanism to be serviced or replaced without discarding the main padlock body.

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
