Specification Summary

Brand	Squire
Product type	Body Only

Product Description

The Squire SS50CEM Marine Grade Stronghold Closed Shackle Padlock is a high-security, compact padlock body designed to withstand both physical attacks and the harshest weather conditions. Featuring a solid hardened steel body with a marine-grade electrophoretic finish, this padlock has been salt spray tested for over 200 hours, making it ideal for marine environments, coastal areas, and demanding outdoor applications.

As a "Body Only" model, the SS50CEM is specifically engineered to accept a modified 71mm double Euro profile cylinder or an SC65 padlock insert (available separately). This allows you to easily integrate the padlock into existing master key systems or keyed-alike suites, providing maximum flexibility and cost-effective maintenance.

The closed shackle design significantly reduces shackle exposure, protecting the 10mm hardened boron alloy steel shackle from cutting, cropping, and prying attacks. It is highly suited for securing garages, warehouses, commercial vehicles, perimeter gates, and high-security doors.

Technical Specifications

- **Body Width:** 50mm

- **Body Depth:** 26mm
- **Shackle Diameter:** 10mm
- **Horizontal Clearance:** 16mm
- **Vertical Clearance:** 16mm
- **Material:** Steel (Marine Grade)
- **Finish:** Black & Blue
- **Mechanism:** Accepts SC65 padlock insert or modified 71mm double Euro profile cylinder (supplied separately)
- **Standards:** CEN Grade 3
- **Weather Resistant:** Yes (Salt spray tested for over 200 hours)
- **Weight:** 541g

Key Features

- **Marine-Grade Protection:** Electrophoretic finish and salt spray tested for over 200 hours to resist corrosion in harsh coastal and outdoor environments.
- **Closed Shackle Design:** Minimises shackle exposure to provide superior protection against cutting and cropping attacks.
- **Boron Alloy Shackle:** Features a 10mm hardened boron alloy steel shackle for high resistance to physical attack.
- **Flexible Cylinder Integration:** Designed to easily fit an SC65 padlock insert or a modified 71mm double Euro profile cylinder, ideal for master key systems.
- **Anti-Drill Protection:** Offers robust resistance against drilling attacks on the cylinder area.
- **Body Only Supply:** Allows you to choose and install your own cylinder to match existing security setups (cylinders supplied separately).

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
