Specification Summary

Brand	Squire
Product type	SQUIRE Stronghold Steel Padlock Range
Keyway	Squire Stronghold Padlocks

Product Description

The Squire Stronghold SS80CS is an ultra-high security closed shackle padlock designed to deliver maximum protection for high-value assets and critical infrastructure. Engineered in the UK, this heavy-duty padlock features a solid hardened steel body and a formidable 16mm hardened boron alloy steel shackle, making it exceptionally resistant to physical attacks, including cutting, sawing, and drilling.

As a CEN Grade 6 approved padlock, the SS80CS meets the highest European security standards. Its closed shackle design significantly reduces exposure to attack, providing an extra layer of defence against forced entry. The lock is equipped with a high-security 6-pin cylinder offering over 260,000 key differs, ensuring excellent resistance to picking.

Designed to withstand the harshest outdoor environments, the padlock features a highly durable electrophoretic anti-corrosion finish, paired with a protective dark blue outer casing to keep the internal mechanism functioning reliably in all weather conditions.

Technical Specifications

- **Body Width:** 80mm
- **Body Depth:** 40mm
- **Shackle Diameter:** 16mm
- **Horizontal Clearance:** 23.5mm
- **Vertical Clearance:** 25mm
- **Cylinder System:** Squire Stronghold 6-pin cylinder
- **Key Differs:** 260,000
- **Security Standard:** CEN Grade 6
- **Material:** Hardened steel body with boron alloy steel shackle

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
